

SAN MATEO COUNTY SHERIFF'S OFFICE

SECURITY CAMERA REGISTRY

"Video evidence from a crime can be a critical component to a case being solved. After a crime, the Sheriff's Office often canvasses the area around the crime scene to see if there are video cameras that may have capture some elements of the crime. This process can take some time.

The attached form allows you to let the Sheriff's Office know that you have a video camera system. In the event of a crime in the vicinity of your cameras, we will have on file information on whom to contact in regards to potentially sharing important video footage.

This information remains confidential, and is never available to the public."
